

Joseph Vetry

Fullstack Developer - Quality Assurance

Jakarta, Indonesia | +6287774401602 | josefvetry220@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

SUMMARY

Tech and digital industry fascinate me and I love connecting with people who share my passion for the tech industry. Excited to gain experience as a Software Developer in any team. Also highly motivated and aspire to have a career as a frontend developer.

EDUCATION

Hacktiv8 <i>Full Stack JavaScript Immersive Program (Transcript)</i>	Jakarta, Indonesia <i>February 2023 - July 2023</i>
Kalbis Institute <i>Bachelor of Information System (GPA 3.23/4.00)</i>	Jakarta, Indonesia <i>2018 – 2022</i>

WORK EXPERIENCE

Superbank <i>Quality Assurance Loan Channeling</i>	Jakarta, Indonesia <i>February 2025 – February 2026</i>
<ul style="list-style-type: none">I played a key QA role in LC Rebuild (OneDash), one of Superbank's core strategic projects aimed at modernizing and centralizing the loan channeling ecosystem. My responsibilities included designing and executing comprehensive functional, integration, and end-to-end test scenarios across critical workflows such as disbursement, repayment scheduling, journaling, and partner system integrations. I collaborated closely with backend engineers, product managers, and operations teams to validate technical requirements and ensure system reliability and accuracy. Throughout the project, I identified defects, improved test case quality, and ensured full coverage for high-Risk components. In addition, I developed and maintained Java-based automation scripts to strengthen regression cycles, reduce manual effort, and support faster release readiness across the loan channeling platform.	
<i>Quality Assurance Customer Experience</i>	<i>March 2024 – February 2025</i>
<ul style="list-style-type: none">I contributed to the quality assurance efforts of various customer experience initiatives, most notably the Video Call Onboarding feature, supporting the project from early grooming to production release. I designed and executed detailed test cases for mobile applications (Android and iOS) as well as internal platforms such as CRM, CMS, and Ops Portal. My role involved performing end-to-end, functional, and regression testing across STG, UAT, and Production environments to ensure smooth and consistent user experiences. I identified and documented defects with clear reproduction steps, provided actionable recommendations to developers, and collaborated with cross-functional teams to ensure alignment between technical implementation and business requirements. I also reviewed test cases to maintain QA standards and contributed to improving overall test clarity and coverage.	

Kanmo Retail Group <i>Technical Internship Ecommerce (Quality Assurance)</i>	Jakarta, Indonesia <i>February 2022 – May 2022</i>
<ul style="list-style-type: none">Managed for the quality assurance technical process in IT department and Digital & Omnichannel (Ecommerce) to help the rest of the team, such as finding bugs on websites or any Kanmo's brands apps, create a test scenario/case using excel, manage progress using Jira app, etc.	

Telkom Indonesia <i>IT Support Engineer</i>	Jakarta, Indonesia <i>June 2016 – August 2016</i>
<ul style="list-style-type: none">As an IT Support Engineer intern, I am responsible for offering application and technical support to the users. I have to respond and resolve the support requests and service tickets. It is a part of my job to identify, diagnose and rectify any issues in computer hardware, software, services, and applications. Should offer reactive and proactive support to business units and take into consideration the critical issues.	

SKILLS

Language: JavaScript

Front End: React JS, Redux, Vue, React Native, Pinia, HTML & CSS, Apollo Client

Back End: Node JS, Express, Sequelize, PostgreSQL, GraphQL, Apollo Server, MongoDB, Redis, Rest API

PROJECTS

Fopy([Frontend](#) | [Backend](#))

A mobile and web-based application to purchase photocopy services and office stationery. Jul 23

Tech stack: React Native, Redux, React, ExpressJs, Apollo Server, PostgreSQL

Pahami

Web-based application about online courses about programming Jul 23

Tech stack: VueJs, Pinia, ExpressJs, PostgreSQL, Axios, JavaScript

Admin Panel

Web-based application serves as an admin panel that can control another website Jul 23

Tech stack: VueJs, Pinia, ExpressJs, PostgreSQL, Axios, JavaScript
